

Passport Hand-held Metal Detector

Introduction

Simplicity of operation of the Passport metal detector is unmatched. Because no tuning or other adjustments are ever necessary or even possible, maximum sensitivity of the instrument can never be compromised, either "accidentally" or otherwise. Yet a Reduced Sensitivity mode is available - with a pressure switch - for scanning near rebar floors or other ambient metal. 15 segment SMT LED array display the size or distance the metal object been detected. An audible alarm and a visual signal indicate detection of any metal.

The Passport includes a rechargeable battery kit featuring a Ni-MH battery.

Specifications

Operating Frequency:.....95kHz

Indicators:

- * Speaker
- * LED Red Light
- * Jack for optional earphone and optional charger

Controls:

- * 3-way Switch (ON, OFF, Momentary Operation)

- * Interference Elimination Switch

Battery:

- * Single 9 volt provides up to 80 hours of efficient operation
- * Optional NiMH Rechargeable operates efficiently up to 60 hours on each 12-hour recharge

Dimensions

Width: 3.25" (8.3 cm)

Thickness: 1.625" (4.13 cm)

Length: 16.5" (42 cm) Weight:

17.6 oz. (500 g)

Options:

Storage pouch Direct
plug-in charger Single
pad earphone
