## PASGT Helmet

(US Personal Armour System  
Ground Troops protection system)

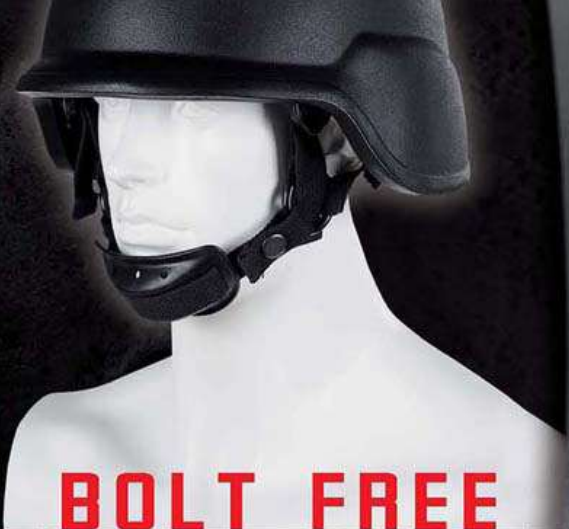

uses our advanced plant and processing techniques to provide enhanced shell protection at lower weight and with improved comfort. We use a 5-point harness system instead of 8-point in the standard US version with improved comfort, balance and reduced fatigue.

**PASGT**  
HELMET

Most of our helmets can be  
manufactured with a bolt free  
harness system.

# COMBAT MKII HELMET

## BOLT FREE HELMET

The COMBAT MKII Helmet is a modified version of the PASGT helmet with a more compact profile giving a lighter helmet that still offers the same excellent level of ballistic performance. A 5-Point Harness is standard on this helmet that offers high ventilation levels with comfort and balance.

Our Advanced Combat Helmet is very popular due to its lighter and more compact size. It still offers the same excellent protection and compatibility as the PASGT helmet but with a 7% weight saving.

This helmet is very popular with Special Forces due to its greater comfort and higher flexibility in extreme conditions.

We use a 5-point harness with improved comfort, balance and reduced fatigue. This helmet is compatible with night vision equipment.

ACH  
HELMET

## SONIC 1 HELMET

This helmet is used by military and special tactical units. It is a PASGT without a peak which makes it compatible with night vision equipment.

## SONIC 2 HELMET

This helmet is used by military and special tactical units. Based on the PASGT it has been designed to be light weight and to offer compatibility with night vision and communication equipment.

## SONIC3 HELMET

This helmet is used by military and special tactical units. Based on the PASGT it has been designed to be ultra light weight and to offer compatibility with night vision and communication equipment.

## CREWMAN HELMET
